

Thesis Supervision Meeting Minutes

This form must be completed by the student, approved, and signed by the supervisor on each meeting, then uploaded to GitLab to create a timestamp.

Date: 21/05/2026

Time: 13:00

Location: Online

Attendees: Student, Supervisor

Key Discussion Points:

- **Progress Update:**

Create and analyse plots for EDA suggested by the supervisor. I found out new information regarding how much data on accidents per state it contains. Figured out that northern states are more deadly than southern states. The most likely factor contributing to that is single road types. I figured out that there is an equal amount of data in each day, but still, the weekends are more deadly than working days. Sunday is even deadlier than Saturday for some reason. More deadlier times are during the night, which is an understandable result. This is the main contribution I was able to make.

- **Challenges Faced:**

There were no challenges.

- **Supervisor's Feedback:**

Supervisor was satisfied with the results and agreed to the next steps I proposed.

- **Next Steps:**

Focus now mainly on Interim Report. Look for more research papers and read/understand them properly to defend my claims. Try to do as much as possible and try to send progress to my supervisor to get proper feedback.

Next Meeting:

Date & Time: 29/05/2026 11:00

Location: Online

Minutes Prepared by: Marek Martinak

Signature of Supervisor: S Moore 29/05/2026
